*This range of Yurts has been developed specially for ease of set up and take down, making them more transportable than most other types of Yurts. They are not meant to bear heavy load, such as an insulation layer or snow. We make our Standard Ger frames from locally-sourced, kiln dried Ash and Scandinavian Redwood.*

*Our Covers are made of 12 oz Polycotton Canvas that is treated against Fire, Water & Rot to meet or exceed current British Standards. Coloured trim may be included at no extra cost.*

*Wooden doors are available for an extra cost & come complete with handles, surface-mounted lock & keys. Windows, Woodstove, Chimney Plate, Additional Doorways, Extra tall walls and Bespoke Platform floors are also all available. Prices for these items vary according to size and requirements.*

**Payment Terms:**

Upon confirmation of your order a non-refundable 30% deposit is required before work commences. This may be paid by Cheque, Bank Transfer or by Credit or Debit Card over the phone. The remaining balance is payable on completion: all goods remain property of Hearthworks until payment in full is received.

**Order to Delivery Time:**

All of our structures are made to order. Depending on how busy we are, Yurts usually take between six and eight weeks to make. Late Spring & Summer is our peak season so the structures may take longer to complete at that time.

**Delivery and Installation:**

You are welcome to collect directly from our workshop. We are also happy to deliver to you: Transport is charged at our fixed rate of 85p + VAT per mile. We offer an Installation and Training service, too. This varies according to the size of your structure: we will advise you of the amount on your personal quotation.
